

How to strengthen the immune system of your home

and prepare
for the coming
of 2019 year?

BEFORE the beginning of Chinese New Year on 04.02.2019

(!) This report is free.

Hello!

The report was written by an international expert in NO BS feng shui, a successful entrepreneur and, a popular feng shui guru. With his feng shui skills, this entrepreneur and self-starter, multiplied his income by at least 100 times since he first applied Feng Shui to his life and business.

Vladimir advises on feng shui (the choice and construction of residential and commercial buildings, and audit of completed properties) as well as in adjacent areas of the Chinese metaphysical sciences. His main specialization is consulting for medium and large businesses.

You can download this report right now and you will learn how to find the right sector and personal dates to clean the house in December 2018/January 2019 in order to mitigate the impact of the 5 Yellow Star, 3 Sha, the Year Breaker and the Grand Duke, and enjoy good luck, health and happiness.

I want you to obtain maximum benefit from this New Year, so this year will be one of the best in your life. To make this happen by using feng shui, let's do a little ritual.

***I am talking about the ritual of house cleaning.** Many people think that the idea of cleaning is about preparation for the coming of the New Year, like we are preparing for the arrival of important guests.*

*Actually, the idea is different. **The true intention is to strengthen the immune system of our home.** In this case, the misfortunes, which in feng shui are called the 5 Yellow Star, 3 Sha, etc., are not dangerous for us and we can enjoy good luck, good health and happiness.*

The key to this ritual is to activate a definite sector on a particular day.

***Good news:** you don't need to clean the entire house, you just need to clean a small sector. This is great for lazy people. On the next page you can see the instructions step-by-step.*

***Have a great Feng Shui in 2019 year!**

How to clean at home to strengthen the immune system?

- ✓ **On a specified personally-for-you date found on the website www.ba-zi.com**
- ✓ **At a favorable time**
- ✓ **In the southeast 1 sector**
- ✓ **Near the outer perimeter of your home, you should clean the sector mentioned above.**

Attention (!)

I am not talking about drilling, banging or repairing in this sector!

I am talking about CLEANING: wash, clean, wipe the dust. Quietly move the furniture, wipe under it, and put it back.

This technique aims to prevent problems, which are supported by Tai Sui, San Sha and Sui Po in the next year.

This is a PREVENTION strategy, not a problem-solving technique.
